

Drought Disaster Impacts Employer Data Collection Form

The Labor and Workforce Development Agency, as a member of the Governor's Drought Relief Task Force, seeks to identify the progressing impacts of the drought on California's industries, businesses, workers, and communities. The information is critical for anticipating and understanding the impacts of the drought and in our efforts to target resources on a timely and effective basis. Aggregated information will also be used in planning responses to the drought; applying for emergency, drought-related resources; distributing State and federal resources; and guiding and supporting local service delivery to businesses and workers.

Please complete the following as accurately as possible:
