## Description of Nature, Purpose and Beneficiaries of Project:

The proposal is a 1,56.2 acre fuels reduction project composed of several treatment units located within and surrounding the Plumas County communities of Portola, Mabie, Iron Horse, and Grizzly Rd up to Lake Davis, California. The proposed project's goals are to 1) reduce the extent of hazardous fuel loading on sites with excessive stand density targeting conifer species 10" or less, and 2) increase spacing between residual trees to maximize forest health and productivity. Treatment methodologies utilized to achieve these goals include 41.2 acres of hand thinning with broadcast chipping, and 1,495.0 acres of mechanical mastication.

☒ Categorical Exemption. State type and section number: 15304; Class 4 Minor Alterations to Land

☐ Statutory Exemptions. State code number:

## Reasons why project is exempt:

This project is located on privately owned lands and fits under Categorical Exemption: 15304 Minor Alterations to the Land (Class 4), which allows minor alteration of vegetation including fuel management activities to reduce volume of flammable vegetation, provided the activities do not result in the taking of endangered, rare, or threatened plant/animal species or cause significant erosion and sedimentation in water. Trees targeted for removal and pruning of residual trees will be restricted to those that reduce the vertical and horizontal continuity of fuels, and/or provide for improved ingress/egress in the event of wildfire. The proposed project has been designed to protect resources from potential significant impacts. This project, as designed, is consistent with the use of a Categorical Exemption
