

Dear Supervisors,

I would like to know the plans for follow up on a few critical issues discussed the during the past several months at board meetings. These topics were rigorously discussed but I'm unaware of the conclusions or plans for resolution.

- 1) First is the Engie energy upgrade project. Is it a done deal or are you looking into the legalities of the process and the contract?
- 2) Next is the property tax issue. What mitigation efforts are being made, by whom and when. Will this topic be revisited at a future meeting?
- 3) And finally the issue that Rick Foster has brought to you several times now – in July, September and November – asking for an accounting of the fines and fees paid by the county over the past few years.

Thank you in advance for your response.

Linda Margaretic
