REPORT OF WELL PROBLEMS DUE TO DROUGHT

To better understand the impacts of the drought, we need to document if water wells are experiencing problems in Plumas County. This information will help look at community issues and trends and will help ensure assistance is available to homeowners or water systems that may need it. We understand the sensitive nature of individual well information and will not release any individual surveys or information.

This is an optional survey, but your information will help us assess drought impacts.

Please complete the following questions regarding your well as best you can.

(Use the back of this form if more space is needed).

1. What is the primary use of the well?

- Domestic/household Ag Irrigation Ag Stock Water Community

Other _____

2. How old is the well? (Approximate year well was installed) _____
