Guidance for Distribution of In Home COVID Antigen Test Kits

In Home COVID Antigen Test Kits which are provided by Plumas County Public Health Agency have the following basic distribution guidelines:

- Please place information sticker provided by Public Health on each test kit before distributing
- Please do not place test kits out for people to grab on their own
- Every test kit should be provided by a staff/volunteer to the person requesting a kit
- One kit per person (may receive more if picking up for household members, who have symptoms or have tested positive)
- The person should at least be 12 years or older; otherwise a parent/guardian can receive a kit for child under 12 years old
- Kits are for anyone in the general public
- Kits are free to the public
- Encourage public call our clinic at 530-283-6330 or go to our website for more information on isolation/quarantine and what to do if they test positive:
<https://www.plumascounty.us/2839/COVID-19-Home>
www.plumascounty.us and click on COVID-19

When supplies are depleted please contact Tina Venable at tinavenable@countyofplumas.com or Lori Beatley at loribeatley@countyofplumas.com as soon as possible so you can be provided more kits as soon as possible. Even though you are not required to track the kits, it is helpful for Public Health to know on average how many kits are provided to the public from your location. In providing an average amount of kits distributed from each location will assist Public Health in ordering enough kits.

Thank you for your assistance.
